PROFESSIONAL SUMMARY

Computer Engineering student (SENAI CIMATEC, in the final stretch of the program) with over 2 years of hands-on experience in backend development and systems integration. Experienced with Python, relational databases (PostgreSQL and SQL Server), building and consuming REST APIs, and backend web frameworks (Phoenix/Elixir), which has made it easy to adapt to new frameworks such as Django and FastAPI. Uses generative AI tools (GitHub Copilot, Claude, Codex) ethically and responsibly throughout the development workflow, always reviewing and taking ownership of code before integrating it into a system. Fluent in English, basic Spanish.

PROFESSIONAL EXPERIENCE

Automation Intern — IP3 Soluções

Sep 2025 – Present

Salvador, Bahia, Brazil — Hybrid

- Efficiently connect the data and system layers, performing direct integration between SQL and VB6 to ensure data consistency and proper information flow.
- Create, structure, and optimize SQL queries to provide robust support for the team's applications.
- Work on the Automation team, developing and maintaining features for the company's core system using VB6 and C#.
- Frontend development: creation and maintenance of web pages for the corporate site using HTML, ASP, and CSS.

Site Reliability Engineering Intern — Infleet

Aug 2023 – Aug 2025

Salvador, Bahia, Brazil — Hybrid

- Created, consumed, and maintained endpoints, ensuring the quality and reliability of integrations through testing with Postman and Insomnia.
- Developed internal automations in Elixir and contributed to feature development for the company's core product.
- Experience in observability and monitoring of infrastructure and production applications using Zabbix and Grafana.
- Used Metabase for ongoing tracking of data and metrics, providing analytical support to guide the technical team's decision-making.
- Worked directly with clients and hardware throughout the full service deployment lifecycle, developing strong business acumen and a deep understanding of the product.

PROJECTS

JobTrack — Job Application Management Platform

Production

jobtrack.com.br

- Full-stack personal project in production, with a discipline of automated testing and continuous deployment (CI/CD).
- Backend and data: Supabase (PostgreSQL) with an auto-generated REST API, business rules via database triggers/functions, and per-user data access control via Row Level Security (RLS).
- Quality: automated testing with Vitest + Testing Library, ensuring reliable releases before deploying to Vercel.

SenaiNotas — Grade Average Calculator

notacimatec.vercel.app | github.com/XandeDelraso/SenaiNotas

- Designed and published a grade average calculator based on my institution's official grading formula, with grade simulation and real-time preview.

AIARA Project (Volunteer)

Mar 2024 – Dec 2024

- Took part in the early development of an app to support the treatment of aphasia, working on prototyping in Figma and defining flows and requirements.
- Co-authored an academic paper on the project, documenting the research and results of the initial development phase.
